

COMP4036 - Mandatory Ethics Checklist (2025)

You **must** complete this checklist prior to testing your software with ANY participants - including yourself. If you answer no to **any** of the questions, you **must** discuss your project with Paul or Gisela to assess the mitigating procedures you will put in place prior to testing.

Important: If you submit your coursework **without** completing this ethics form and have conducted a study on anybody, including yourself, this is academic misconduct. You will receive a mark of zero for the coursework, and may face further measures.
